Pakistan, open to relocation

Project Manager | Health & Safety Officer | Software Developer

PROFESSIONAL PROFILE

I am a project management and health and safety professional with an MS in Project Management and a BS in Computer Science, along with NEBOSH IGC, IOSH Managing Safely and OSHA certification. I have seven years of experience in construction and healthcare project delivery, including five years as Assistant Project In-charge on a live medical complex, and I have completed over 500 engagements for international clients across Europe, the UK and the Gulf. I am used to handling schedule, cost, risk and health and safety compliance on the same project. I am available for relocation to Saudi Arabia and the wider GCC, and to Europe.

KEY COMPETENCIES

Project delivery	Project management plans, WBS, Gantt scheduling, milestone tracking, progress reporting
Cost & risk	Budget control, cost variance analysis, risk registers, business continuity and disaster recovery planning
HSE compliance	Risk assessment, method statements, permit-to-work systems, incident investigation, toolbox talks, site inductions
Technical	ASP.NET, Python, SQL databases, WordPress, Android and PWA development, MS Project, Primavera fundamentals, Excel reporting
Standards	PMBOK-aligned project documentation, ISO 45001 principles, OSHA and NEBOSH frameworks
Stakeholders	Contractor coordination, vendor and procurement management, client reporting, team supervision, training delivery

PROFESSIONAL EXPERIENCE

Assistant Project In-charge

Ibn-e-Sina Medical Complex | 5 years

- Ran the day-to-day delivery of facility and development projects across a working medical complex, keeping construction and maintenance activity separated from live clinical operations.
- Planned schedules, tracked milestones and reported progress, cost position and risk to management.
- Applied HSE controls on site: risk assessments, permit-to-work, contractor induction and incident reporting.
- Coordinated contractors, vendors and internal departments; managed procurement and material flow.
- Designed and deployed a hospital store inventory system covering purchasing, sales, billing, departmental stock and over 30 management reports, replacing manual record keeping.

Web Developer (ASP.NET)

Askari 11 | 2 years

- Built and maintained ASP.NET web applications and internal tools from requirements through to deployment.
- Designed SQL databases, wrote queries and reporting views, and resolved production issues.
- Worked directly with non-technical stakeholders to turn operational needs into working software.

Independent Consultant, Project Management and Software

Fiverr, Upwork and direct clients | Ongoing

- Delivered over 300 web and application development projects and over 200 project management engagements for clients in the UK, Europe, North America and the Gulf.
- Produced project management plans, charters, WBS, schedules, risk registers and feasibility studies to PMBOK structure.
- Maintained a 5.0 star rating across 78 reviews with 100% on-time delivery, and a 94% job success score on Upwork.
- Built desktop and mobile applications in Python, and delivered data cleaning and reporting work on government health programme datasets covering over 34,000 records.
